

# TPU Natural

Thermoplastic polyuretan elastomer

TPU Natural is a flexible thermoplastic that can print many parts that require great flexibility. This material presents high wear and abrasion resistance, high tensile strength and resistance to tear propagation, good damping characteristics and offers a high resistance to chemical. It is ideally suited for industrial applications and offers a high quality of resolution when printed.

Applications: Footwear, Sports & Leisure, Automotive, Industrial manufacturing, Belts and profiles, Medical engineering, etc.

Hardness: 33 ShoreD

Elongation @ Break: 660 %
